

Conservation Field Worker

Location: Living Springs, Whakaraupō/ Lyttelton Harbour
Reports to: Conservation Officer/Team Leader
Hours: Full-time – 38 hours/week, \$23/hr
Status: Maximum Term Contract – 12 months

INTRODUCTION

Living Springs was established in 1972 and will soon celebrate 50yrs of operation at the head of Whakaraupō/ Lyttelton Harbour. Known principally as a Camp/Convention Center it is also a significant landowner with approximately 400 hectares of indigenous forest and pastoral farmland flowing down from rocky outcrops at the crater rim to moderate hills and wetlands at sea level. In recent years it has become a leader in environmental restoration within the Harbour region and combined with its hosting of several thousand young people each year it is in a unique position to engage the next generation with the wonders of the natural environment.

Living Springs will deliver a varied three-year conservation work programme based primarily at Living Springs with other supplementary sites around Whakaraupō.

SUMMARY STATEMENT

The Field Officer will be responsible for contributing to biodiversity enhancement within Whakaraupō.

They will work closely with other field staff, their team leader plus the coordinator to deliver and monitor conservation outcomes.

The ideal candidates will be organised, conscientious and have experience working outdoors in rugged terrain and in variable weather conditions. This role will suit a self-motivated person with a strong work ethic. Someone that can operate well both in an isolated environment and as part of a team. They will have a strong community focus.
